(2) How to add different dependencies

## ② main UI

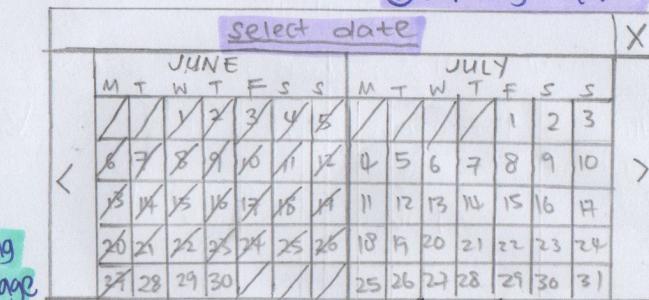

## ④ creating new task

changing language

## ③ language

language

⑤ input basic details

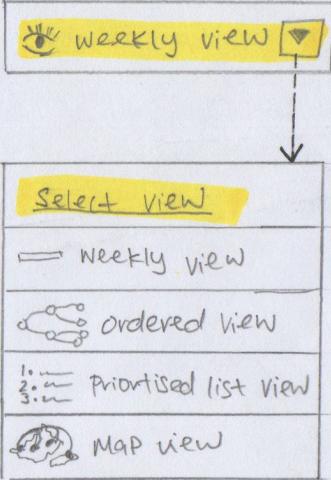

1 to 99

day(s), week(s), months(s)

auto-fills for each other  
not started, in progress, completed

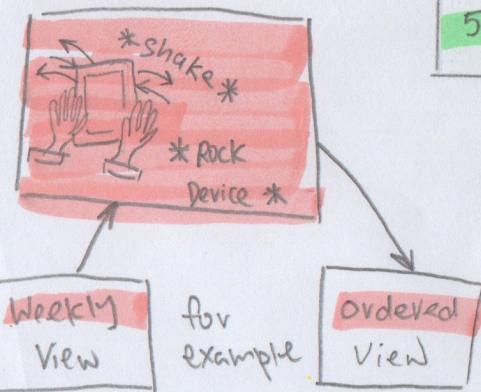

A\*

**②** different views available for user

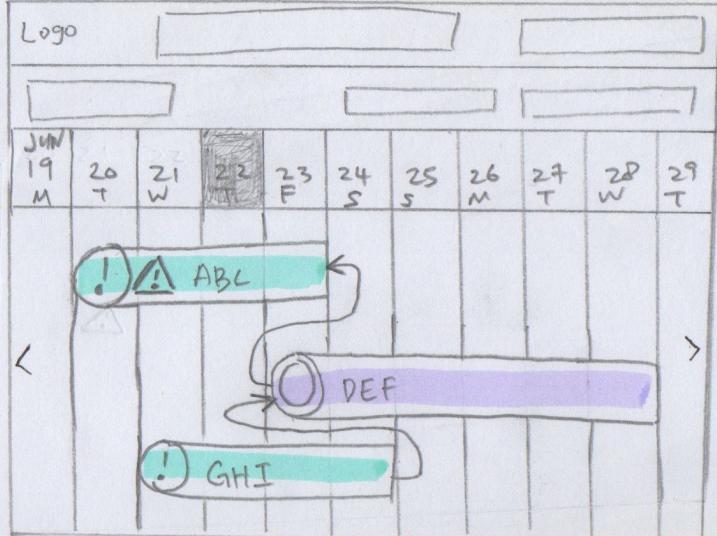

**⑥** user short cuts

if on tablet/phone  
shaking device can  
aid in quickly  
going into another  
view

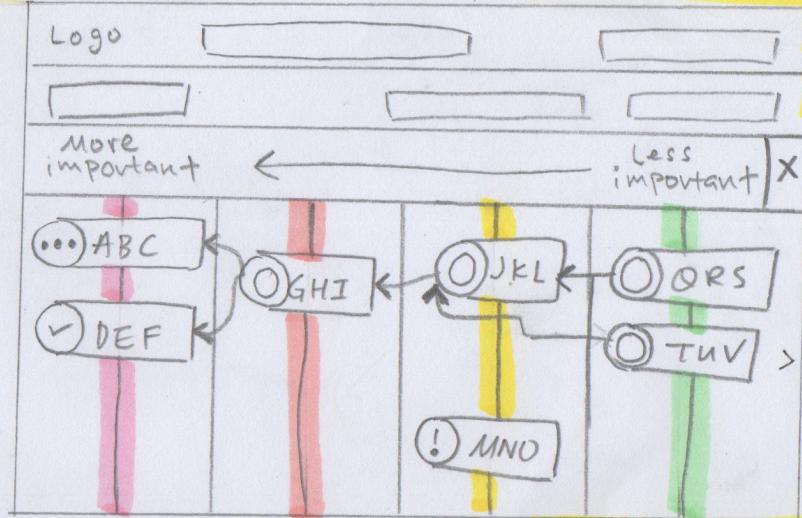

**②** weekly view

User able to have a bird's eye view of the weeks ahead

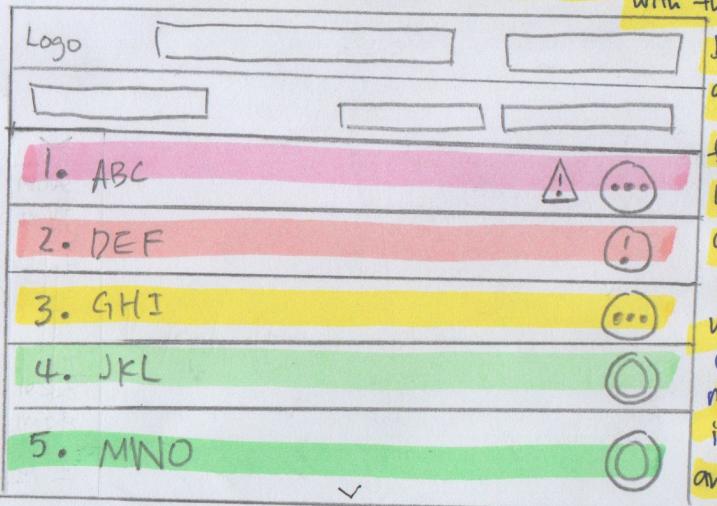

**③** ordered view

User get to see which task precedes the others in an ordered manner

**④** prioritised list view

User gets to view items as a list with the app being able to filter out which are the tasks which are more important and push user to work on it first

**⑤** map view

User able to view locations involved, if the user happen to be going to many areas in a day, user can re-plan their Schedule based

as user can view all locations, they can split their days based on location as well and modify their schedule as required.

Making it easier to plan.

On location as travelling all around Singapore is not fun.

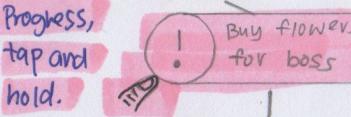

② move details about the task is displayed.

Task title: Buy flowers for Boss  
Start date: 27/06/2022 DD/MM/YYYY  
Duration: 2 days  
End date: 28/06/2022 DD/MM/YYYY  
Progress status: not started  
Description: Got flowers for Boss's table, perhaps a few roses to order before collecting.  
Suggestion: Find nearby flower shops!  
1. Sunflower florals pte ltd, 2km away, 6xxxxx  
2. Amazon flowers pte ltd, 3km away, 8xxx xxxx

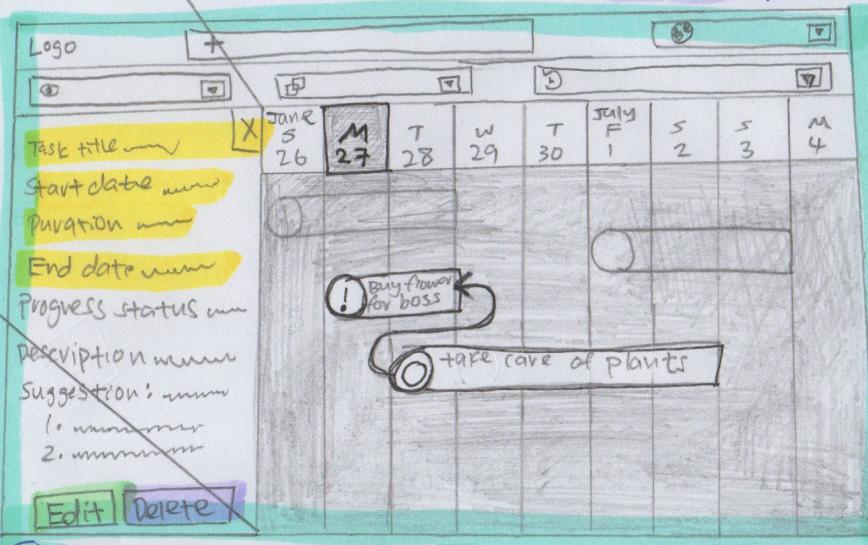

③ insightful suggestions provided.

Edit task Delete task

④ to update task

① when a task is tapped on, window above slides out from the left side of the window.

⑧ When selected, this is how the UI will look like. with non relevant items greyed out.

⑨ When tapping the edit button, the window for creating new tasks will pop out with the header being "Editing task" and relevant fields filled up with the existing information filled.

⑤ circle gets animated

⑥ Task

⑦ the same can be done to update from "in progress" to "completed".

B\*

View drafts

- Buy items for pantry
- Study for company cont
- Get ready for Christmas

⑫ able to view tasks saved as draft

C\*

View previous actions

- deleted buying coffee cup
- created take care of ...
- changed date take care...

⑬ able to view history and undo specific action or until a certain point

undo action

deleted buying coffee cup

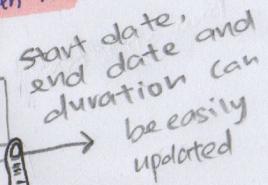

undo Just this action

Yes

No

OR  
all previous actions upto this point

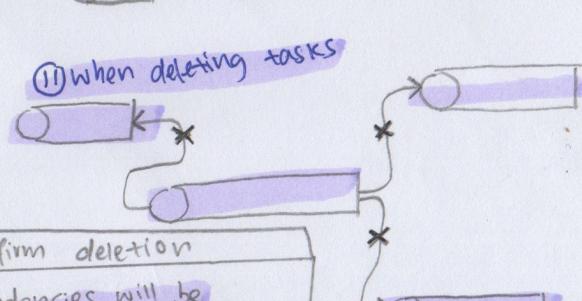

⑩ alternative ways to edit task when it is selected.

Upcoming deadline

whole start,end dates can be shifted entirely as well

⑪ when deleting tasks

Confirm deletion

dependencies will be affected, confirm task deletion?

Yes

No

### ① Searching and inputting locations

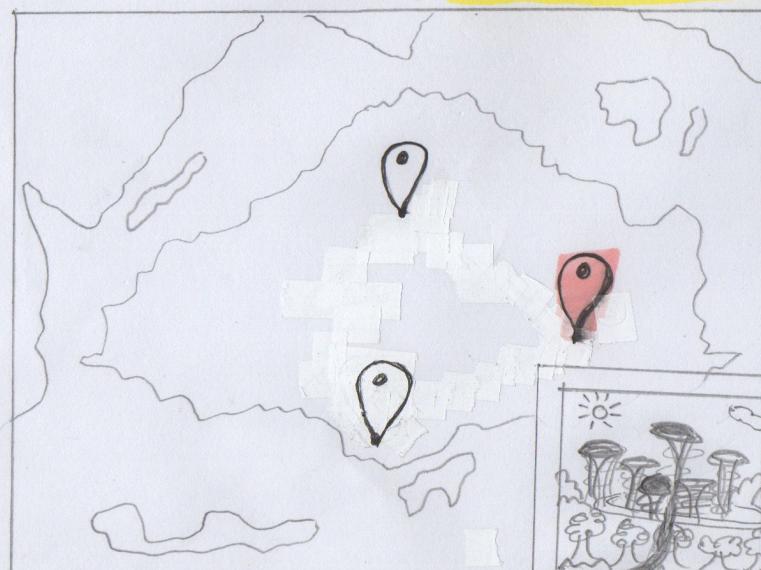

Location  ... ★ D

**Gardens** ↑

### ④ Adding labels to tasks

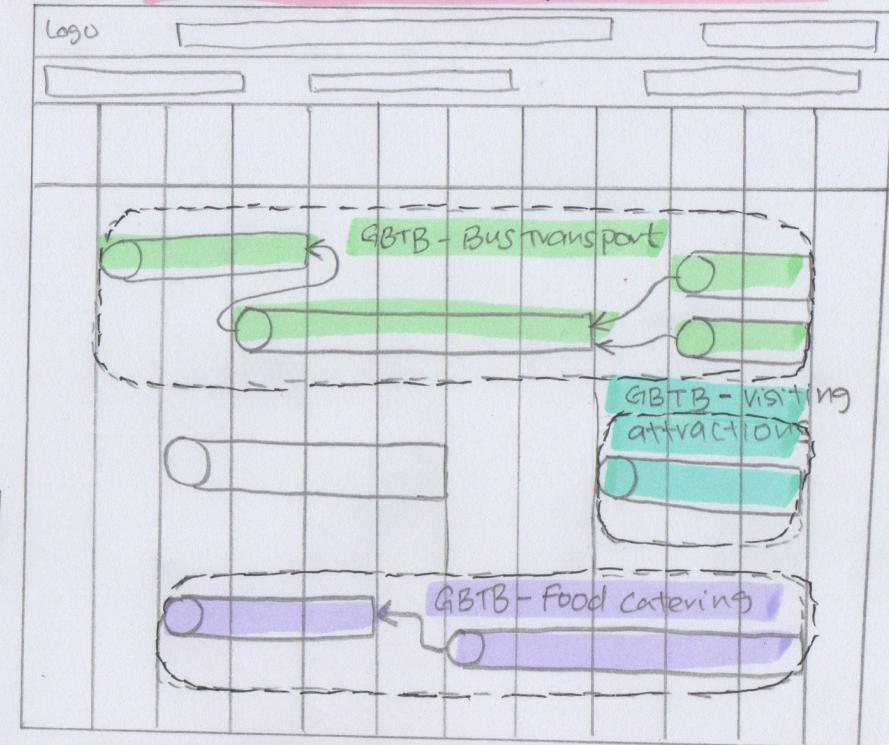

⑤ Creating new label if needed

Create new label

input Name:   
confirm label?

Yes  No

### ⑥ Preview of how labels would look like

⑦ Helps in making things neat if there are many multiple concurrent work on the same page, for example: work / school personal tasks

③ When selected, a preview and basic information is provided for user to pick and easily identify the correct location.
